DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 30-59 been renumbered 24-52.

2. Original claims 1-23 and misnumbered claim 30 have been canceled in favor of claims 31-59, which have been renumbered 25-52. Claims 25-52 are pending.

3. Due to confusion regarding the claims and unexpected problems because of the electronic system used now by the Patent Office, the examiner has decided to write a new restriction, rather than contacting the applicant to elect by phone. The examiner apologizes for the delay and requests applicant submits a new complete listing of renumbered claims to avoid future confusion in response to this Office Action. Be sure to list Claims 1-24 as canceled and then renumbered claims 25-52 as pending.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-48, drawn to tape dispensing, classified in class 156, subclass 539.
- II. Claims 49-52, drawn to method for closing and sealing two adjacent flaps, classified in class 156, subclass 304.1.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1734

5. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed does not need the details of the system claims and the process can be achieved by a materially different apparatus or even by hand.
6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
